

Multi-User • Web Enabled Real-Time Information and Reporting

Automated & Autonomous

100% Automated Facility Control, Completely Integrated with Popular Rental Software.

100% Industrial Grade

Highest Quality Design and Hardware For Demanding Critical Facility Control 24/7/365.

• Facility Security Control

Access Control - Unit Alarming - Roller Shutter Motor Control - Elevator Management - Perimeter Alarm Integration - Fire Control Integration -Gate Position Monitoring - Man Door Monitoring - Lighting

Web Enabled

A unique combination of Internet flexibility without the reliance on Internet Availability!

• Facility Perimeter Security

Integrates with Perimeter Alarm and/or Fire Panel

• Facility Graphics

Active Visual Facility Notification

• Expandable and Up-Gradable

Expandable as Your Facility Grows - Up Gradable to include most new products

Multi Platform

Available in your choice of Linux or Windows Models.

• Multi-Facility - Control Room

Optionally available multi-facility simultaneous monitoring and control in a Control Room environment.

• Real Time Reporting

Every action is recorded, no data is deleted.

• Your Local Language

User defined remote messaging input and controlled by you, the owner and user. Languages and fonts supported include Russian and Eastern European.

Global Electronics, Ltd. 500 N 56th Street Ste 15 Chandler, Arizona 85226 800-591-6989 www.Global-Electronics.com

Axcys Facility Security Management System is the Global Electronics' second generation facility management tool created specifically for the needs of modern Self Storage properties, managers, owners and operators. After several years of painstaking work, attention to detail and closely listening to our customers and the Self Storage Industry, Global is releasing its carefully developed next generation of Axcys products.

This next generation of Global Electronics' facility management tools has been created specifically for the needs of modern Self Storage properties, owners and operators. This is not a new version, but a totally new, next generation product! It includes many innovative and surprising features designed to make Self Storage Facility Security Management a truly completely managed and automated environment with local as well as distant

control packaged within Axcys. It also feature real time information available to credentialed users on-site, off-site, or anywhere an Internet connection is available - on Windows, Linux. Mac or iOS products!

Axcys features a Dashboard style main view and optional graphical view. Like Globals full scale, large screen counterpart, Axcys graphical view provides the same real time facility display product, used at many locations in place of client computers, but on your local client.

Both the Dashboard and Graphical views provide easy, fast manager analysis of facility stability, occupancy and current use. Traditionally displayed on large screen monitors, facility staff, tenants and prospective tenants can view the events occurring onsite, in real time.
